

SIRIM QAS INTERNATIONAL PRIMED TO CERTIFY PREFABRICATED TANKS-PACKAGE PLANTS ACCORDING TO SPAN TS 1401:2010 (A1: 2013)

National Water Services Commission (SPAN) has recently published a revised edition of Technical Specification for Sewerage Treatment System for Package Plant Products (Revised Edition March 2013) comprising 2 parts as following:

“SPAN TS 1401:2010 (A1:2013) Part 1 : Prefabricated Tanks-Packaged Plants”,
“SPAN TS 1402:2010 (A1:2013) Part 2 : Construction and Installation-Packaged Plants”

SPAN as the regulatory agency for water services industry has enforced the use of these documents as an official formal reference for technical specifications of packaged plant comprising manufacturing, design of prefabricated tank, construction, installation and treatment performance and operation of the system.

Pursuant to the announcement from National Water Service Commission (SPAN) on the requirement of prefabricated tanks-package plants suppliers to show proof of compliance to the SPAN TS 1401:2010 (A1:2013) Part 1 : Prefabricated Tanks-Packaged Plants, SIRIM QAS International Sdn. Bhd. being a recognized independent Certification Body, would like to announce that our team are ready to provide product certification services to meet client demands with integrity and impartiality.

Our Product Certification Scheme is based on SYSTEM NO.5 (reference ISO/IEC G 67) where compliance is achieved through on-site factory assessment of the manufacturing processes, as well as type testing of product samples and follow-up with surveillance program.
